

Ultra LITE™ Luminescence Substrate Kit
Catalyst-Induced Sustained Chemiluminescence Detection System

Product Highlights

- Utilizes novel luminescence substrate
- Highly sensitive non-radioactive detection system
- Low background with longer light emission
- Detects specific protein in less than a minute
- Optimized for re-probing with variety of antibodies
- Applicable for 1D, 2D and acrylamide-agarose gels
- Comes with fully optimized HRP-labeled secondary antibody

Ordering Information

Catalog #	Product Description	Price, \$
CDS-001	Ultra LITE™ Substrate Kit (2500 sq cm membrane) anti rabbit HRP-IgG	250.00
CDS-002	Ultra LITE™ Substrate Kit (1000 sq cm membrane) anti rabbit HRP-IgG	125.00
CDS-003	Ultra LITE™ Substrate Kit (2500 sq cm membrane) anti mouse HRP-IgG	250.00
CDS-004	Ultra LITE™ Substrate Kit (1000 sq cm membrane) anti mouse HRP-IgG	125.00
CDS-005	Ultra LITE™ Substrate Kit (2500 sq cm membrane) anti human HRP-IgG	250.00
CDS-006	Ultra LITE™ Substrate Kit (1000 sq cm membrane) anti human HRP-IgG	125.00
CDS-007	Ultra LITE™ Substrate Kit (2500 sq cm membrane) w/o antibody and blocking agent	200.00
CDS-008	Ultra LITE™ Substrate Kit (1000 sq cm membrane) w/o antibody and blocking agent	100.00
